

Delete Your Project

We are at the end of this guide now. As a final step and to clean up our work we will finally delete the project we have created.

1. Select **Delete Current Project** from the **Project** menu.
A message appears asking you if you want to proceed.
2. To delete the project click **Delete**.
After the project has been deleted the PoolParty dashboard will be displayed.

If you want to know more about the advanced features that were not mentioned in this guide, take a look at the [PoolParty - User Guide](#) to get a complete overview.

If you have questions or if you have found something which might be wrong or missing in this guide, we welcome any of your suggestions (support@poolparty.biz).
