

The Workflow Dashboard

Find basic information here on the workflow dashboard in PoolParty.

The workflow dashboard provides you with an overview of different workflow related aspects when working with the PoolParty Thesaurus Server.

On the left you can switch between the different available dashboards. On the right you get the list of all objects that are related to the respective workflow. You can review them and actions are available to trigger next workflow steps.

The screenshot displays the PoolParty Workflow Dashboard interface. At the top, there is a navigation bar with tabs for PROJECT, CORPORA, TOOLS, and ADVANCED. A search bar is present with the text 'en Search Thesaurus Concepts'. Below the navigation bar is a sidebar with four categories: 'My Draft Concepts (0) Concepts', 'All Draft Concepts (264) Concepts' (which is selected), 'Suggested Concepts (2) Concepts', and 'Deprecated Concepts (4) Concepts'. The main content area is titled 'All Draft Concepts' and features a table with columns for Concept, Note, Assignee, and Last Change. A table with 5 rows is shown, each with a yellow warning icon, a concept name, an assignee, and a timestamp. Action icons for each row include a plus sign and a refresh icon. A blue button labeled 'Approve All Concepts' is located in the top right corner of the table area.
